ABOUT ME

- Engineer wanting to be a UX designer

- ECE major (2021 passed out).

- I design, sing, sketch and learn.

MY WORK

Worked on several projects during my UG program.

A few of those include a web-application designed for buying, selling and trading books online

A data analysis project called "Uber Data Analysis".

Former intern at MyCaptain. Worked as a visual designer, copywriter and marketer.

UBER Data Analysis

This is a machine learning – data analysis project where I analysed a dataset containing millions of Uber pickup and drop locations in New York.

I visualised the data using different plots and graphs and defined the trends and seasonalities.

Made it into an interactive design which can be used by Uber to understand it's sales and grow it's business.

- Here's a screenshot of the design where a person can easily move a scrollbar to see the frequency of uber pickups at any point of time.

After analysing the data, I also made an interactive dashboard with different types of visualisations that can be used to easily understand the trends.

What I know

* TOOLS : ADOBE CS, FIGMA, CANVA
* LANGUAGES : ENGLISH, HINDI, TELUGU
* PROGRAMMING SKILLS : PYTHON, C, C#, JAVA
* WEB-APPLICATION DEVELOPMENT USING ANGULAR

SKILLS

- TOOLS : Adobe CS, Figma, Canva

- LANGUAGES : English, Telugu, Hindi

- PROGRAMMING SKILLS : C, C#, JAVA, Python

  Web-app development using Angular.

Sometimes I also enjoy working on ADOBE illustrator.

Here are a few of my arts on illustrator
